Village of Spring Valley Launches Community Engagement for "Spring Valley Safe Streets" Initiative

BY: Village of Spring Valley Press Release

Residents Invited to Share Feedback and Help Shape a Comprehensive Roadway Safety Plan for the Village

Spring Valley, NY — The Village of Spring Valley is launching the public engagement phase of Spring Valley Safe Streets, a community initiative to develop a Safe Streets and Roads for All (SS4A) Comprehensive Safety Action Plan focused on improving roadway safety, mobility, and quality of life throughout the Village.

Funded through the federal Safe Streets and Roads for All (SS4A) grant program, the Spring Valley Safe Streets initiative will help the Village identify transportation safety concerns, analyze crash trends, and develop recommendations to reduce traffic-related injuries and improve safety for all roadway users, including pedestrians, bicyclists, motorists, and transit users.

As part of this phase of the project, the Village is inviting residents, business owners, commuters, and visitors to share feedback on roadway safety concerns and potential improvements throughout Spring Valley.

The project team is reviewing existing transportation conditions and crash data to identify safety challenges and opportunities throughout the Village. This analysis, together with input from the community, will help inform recommendations for future transportation safety initiatives and infrastructure improvements.

Community members are encouraged to visit the Spring Valley Safe Streets project website and share their feedback through the Interactive Map. The map allows participants to identify specific locations where they have experienced roadway safety concerns and suggest potential improvements. Feedback gathered through this tool will help the project team better understand community priorities and identify areas that may warrant further consideration.

Community members will also have opportunities to connect with the project team at upcoming community events and pop-up activities. These activities will provide opportunities to learn more about the initiative, discuss roadway safety concerns, and share ideas for improvements. Details will be posted on the project website as they become available.

Project Website:
www.SpringValleySafeStreets.com

The Interactive Map is available through the "Get Involved" tab on the project website. Visitors can also learn more about the project, review existing conditions findings, and explore initial ideas for improvements.

The Village values community participation throughout this process and encourages everyone who lives, works, or travels in Spring Valley to share their perspectives and help shape the vision for safer streets.
